

FSW-Tech

Friction Stir Welding European Qualifications

FSW-TECH will create a **European Harmonised Qualification for Friction Stir Welding**, including three professional profiles:

European FSW Operator (EFSW-O)

European FSW Specialist (EFSW-S)

European FSW Engineer (EFSW-E)

FSW-TECH will develop three new professional profiles and training materials in 4 languages

Objectives:

Deliver a European qualification that will improve the quality of VET system by incorporating common European tools

Create and implement a new qualification programme for FSW recognised between European countries

Harmonised standard of qualification in FSW sector

Increase transparency of competences and qualifications for the Manufacturing sector.

Involve different stakeholders in the training process

Foster new learning opportunities, in an easily accessible and career-oriented VET profile

Impact:

Implementation of FSW learning units

Creation of jobs by companies involved in FSW

Creation of the EFSW-O, EFSW-S, EFSW-E and Profiles Curricular Toolbox
